EDUCATION

University of Calgary
Bachelor of Science in Software Engineering, With Distinction
• Coursework: Data Structures & Algorithms, Operating Systems, Networked Systems, Distributed Systems, Software Architecture, Design Patterns, Object-Oriented Development, Scalable Data Analytics
• Dean's List | Engineering Entrepreneurship Certificate | Co-op Education Program | Schulich Leadership Program | Scholar Program | Global Experience Program

Calgary, AB
September 2021 – April 2026

EXPERIENCE

Junior Change Analyst
TC Energy, SAP Plus Program
• Apply a software and data analytics background to an enterprise SAP integration, translating complex business and system requirements into structured documentation for cross-functional teams.
• Coordinate across engineering teams, subject matter experts, and offshore analysts through the full project lifecycle of a large-scale systems integration.

Jul 2026 – Present
Calgary, AB

Software Developer Intern
TC Energy
• Maintained and enhanced scalable, fault-tolerant backend systems for 10+ enterprise applications, debugging production issues and improving performance, reliability, and system stability through monitoring and troubleshooting.
• Developed ETL pipelines and a cloud-based data lake in Python and SQL on AWS, integrating multi-source data with validation processes to support distributed analytics workflows.
• Redesigned workflows using Python automation and data pipelines, reducing execution time by 85–90% and improving reliability across operational processes.
• Leveraged AI-assisted development tools to accelerate feature development, generate test coverage, and improve overall code quality across production codebases.
• Participated in code reviews, CI/CD-supported deployments, and debugging of production incidents, contributing to technical documentation and design discussions across the team.

May 2025 – June 2026
Calgary, AB

Project Manager Intern
TC Energy
• Supported 40+ pipeline integrity projects worth \$100M+, ensuring preventative maintenance and operational reliability across Canada, by collaborating with 7 project managers to align deliverables and track milestones.

May 2024 – May 2025
Calgary, AB

Data Scientist Intern
M2M Technology
• Built and iterated supervised and unsupervised ML models with scikit-learn, including feature engineering, cross-validation, and hyperparameter tuning to improve predictive performance.
• Implemented reproducible Python ETL pipelines (pandas, NumPy) for large-scale data cleaning, transformation, and model evaluation.

May 2023 – August 2023
Vancouver, BC

PROJECTS

Automated Financial Analysis Pipeline (Capstone) | *Python, FastAPI, React, LightGBM*
• Built an end-to-end ML pipeline with real-time market-data ingestion via the IBKR API, serving model outputs through a FastAPI backend and REST APIs to a React dashboard.
• Architected the backend services and API layer, applying object-oriented design and design patterns for maintainability.

September 2025 – April 2026

RoadReview | *React, Node.js, PostgreSQL, Docker*
• Built a full-stack platform with a multi-person Agile team, owning React pages end-to-end and building Node.js and PostgreSQL backend services with Google OAuth, containerized with Docker.

January 2026 – April 2026

Flight Reservation Application | *C++, MySQL*
• Built a C++ reservation system with a team, structuring it around object-oriented design and design patterns over a MySQL database.

September 2023 – December 2023

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL, Go, Ruby
Software Engineering: Data Structures & Algorithms, Object-Oriented Design, Design Patterns, System Design, Distributed Systems, Microservices, REST APIs
Backend & Data: Backend Development, ETL/ELT Pipelines, AWS (S3, Lambda, Glue), PostgreSQL, Linux
Frontend: React, Node.js, TypeScript, HTML/CSS
Testing & Tools: Unit Testing, Integration Testing, End-to-End Testing, Debugging, Code Reviews, CI/CD, Docker, Git

EXTRACURRICULAR LEADERSHIP

UofC Diversity and Advocacy Committee | *Director of Socio-Economic Welfare*
• Hosted and managed community initiatives and fundraisers promoting inclusion, engagement, and access to resources.

September 2023 – April 2026
